Yours . . . a new
wonderful world of fun

Why not live a new lifetime... having the time of your life?

That's AVION living!

Avion travel is far more than "seeing the country." To the Avion owner, it means living life to the full. Seeking new horizons. Making new friends. Enjoying your very own luxurious accommodations wherever you choose to stop awhile. Complete independence. Freedom. Happiness!

Around and within the experience of Avion ownership has developed a new lore, a new zest for life. A love of adventure . . . adventure hitherto well nigh impossible for many. Regardless of age, Avion owners find a new wonderful world of fun. There's no highway too long, no byway too challenging for the Avioner, with his self-contained home-on-wheels.

What about *you? Your* own cherished hopes and dreams of independent, carefree luxury travel? Taking off by yourself or with good friends. Unfettered by timetables, free of reservations worries . . . safe, sure, secure. Whatever your age, Avioning can be the fulfillment of your lifetime longing for travel adventure.

Long ago, Carlyle wrote, "We live no more of our time here than we live well." And Voltaire observed, "We never live – we are always in the expectation of living." Even today, a familiar expression is "Why not *live* a little?"

But why not *live a lot?* Why not live a *new* lifetime, having the time of your life?
That's *Avion living!*

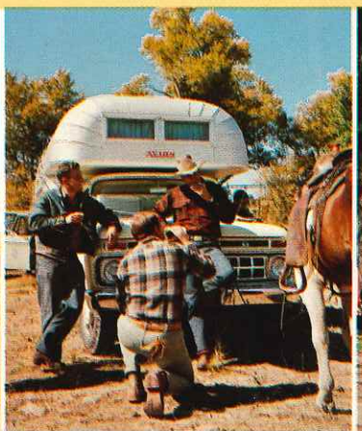
*Not included when customer makes factory pickup, but should be purchased in advance from franchised Avion Dealer or may be purchased at Factory Service Centers.

Pick your favorite popular-make pickup . . . Avion's Camper Coach fits them all!



Built like the modern jets...

Riveted-and-sealed double-wall all-aluminum construction with molded fiberglass interior end shells. Rugged. Clam-tight. Long-lived. Feather light . . . leather-tough! Engineered like modern jet aircraft, your Avion can take all the stress, strain, bounce and jounce any back trail offers. Anywhere your car goes, there goes Avion!

Lustrous, long lasting beauty

Avion's maintenance-free aluminum is *anodized;* stays like new without painting, waxing or polishing. Just wash it occasionally. Its permanently sealed smooth surface won't darken or fade. Doesn't show age or wear. The satiny non-glare finish softens sun reflection – a highway safety feature.

Avion aluminum is tougher, stronger, too. Twelve hours of electro-chemical anodizing per coil makes it harder. Resists scratches, pits and dents better than ordinary aluminum.

Distinctive aerodynamic design

Avion's graceful contoured styling earns admiring glances wherever you travel. But its slip-stream design is plenty functional: it laughs off head winds and cross winds like a sea gull 'round a sailing ship. Down a mountain pass or flat out on a freeway, you'll experience amazingly smooth haulability – controlled, solid, quiet. Many engineering skills of our modern missile age have been incorporated in its unique design.

Jet-like aluminum construction. Lasting carefree anodized finish. Aerodynamic design. All these and more, make an Avion worth more when you buy it and while you own it. Worth more when (if) you sell it.

Avion matches quality with modern aircraft. Top-flight engineering and the finest that modern metallurgy affords.

5 APR 1967

More even temperature comfort wherever you find your outdoor fun.

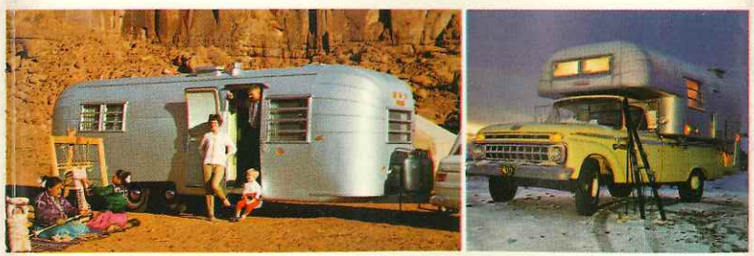
Revolutionary and amazing new THERMO-X insulation – another Avion "first".

It's the greatest travel trailer advancement since Avion introduced anodized aluminum! Thermo-X has nearly twice the insulating value of glass fiber. It is the same insulation used in ultra-modern refrigerated trucks and freight cars. And because of its strength, heat resistance and moistureproof qualities, it is also used in our nuclear submarines and guided missiles.

Sprayed on in liquid form between Avion's aluminum skins, Thermo-X "foams" (expands) to 30 times its original volume! Fills all riveted seams for a positive weatherproof and dust proof seal – then hardens to strengthen structural rigidity. Yet it retains an elasticity that flexes with Avion's aluminum framework. At the same time, it leaves an effective insulating air space between the Thermo-X and the aluminum inner skin.

Thermo-X's closed cells will not absorb moisture. And for added safety, it is self-extinguishing and non-burning. It is effective at temperature extremes from 200° above to 300° below Fahrenheit.

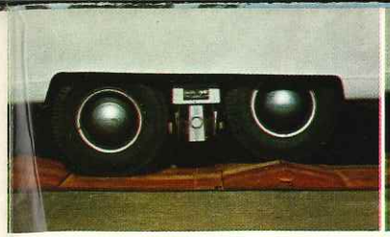
Thermo-X is featherlight, too! For comparison: Balsa – that lightest of woods – weighs approximately 9 pounds per cu. ft. Thermo-X weighs only two pounds per cu. ft.



Whether you go where there's heat or snow — amazing Thermo-X protects!

Every Avion has new Thermo-X insulation in the sidewalls and ceiling. Another Avion quality feature for your comfort.

5 APR 1967



Wheels down-up-and-over the bumps but with your Avion steady-as-she-goes!

No wheel stammer or trailer jounce, no frame-twisting with Smooth-Glide control.

Sensational new suspension

Like hitching your car to a floating cloud!

Fantastic roadability! Towing ease that's almost unbelievable – until you've taken the tow test yourself!

So sm-o-o-th we've named it SMOOTH-GLIDE! Standard on *all* 1967 Avion Trailers. It's built for us by MOR/ryde, trailer suspension specialists.

Now your new Avion feels like a living room-on-wheels as it *Smooth-Glides* along behind you – without jerks, jolts or jumps. And at journey's end – open your Avion door – SURPRISE! Your dishes still stacked and racked, clothes still on their hangers, your belongings right where you left them. Everything shipshape, undisturbed – thanks to that Smooth-Glide ride.

Tires last longer too, because Smooth-Glide *absorbs* the beating that trailer tires normally take. Smooth-Glide gentles the jolts, eases your tires into-and-up-and-over the ruts and ridges without those stuttering skips and skids that take their toll in tire life.

Your 1967 Avion protects your pocketbook in many other ways as well. Lets your appliances, furnishings, cupboards and contents enjoy the ride safely and securely. 1967 Avions will stay younger longer, thanks to Smooth-Glide.

Experienced trailerites are amazed at Avion's new road-holding ability. Effortless, travel-true steering. Flat, virtually roll-free cornering. There's a new inbred sense of stability and control that takes away tension, puts even the rank beginner at ease. New Avion Smooth-Glide minimizes the miles – makes journeys more enjoyable, safe, carefree. *The proof is in the towing.*

Try it!

Here's what Smooth-Glide (tandem model) looks like. No coil springs. No leaf springs. No lubrication. The secret's in the rugged rubber-block suspension plus hydraulic shock-control. Proved in millions of miles of heavy duty highway truck trailer use — and now scaled to Avion requirements. More road clearance. Wider suspension. Simple. Safe.

5 APR 1967

And while you're dreaming of travel fun, family fishing and hunting trips, think Avion. Avion Camper Coach. And what a cozy, convenient complete traveling cabin it is when you're 'way back in bush country! Or on vacation, enjoying the scenic splendor that is America.

Maybe for now you only want to get away for an overnight or week-end on your favorite lake or trout stream. Fine! But don't just dream there . . . GO! The FUN-way. GO AVION.

All your travel visions are within easy, *comfortable* reach with an Avion aboard your pickup. In this revolutionary camper coach you play, cook, eat and sleep in a kind of quality and comfort heretofore unknown in pickup camping.

Your Avion lets you really enjoy getting there! Its light weight and its aerodynamic aircraft styling won't fight the winds. Lets you cruise with ease at turnpike speeds. Your pickup is agile, responsive, easy to drive on back country lanes, on mountain grades. Handles practically like a passenger car.

And when you arrive, the only tool you need to set up camp is your pickup ignition key. Turn it off – and you're camping! Then open your Avion to a world of conveniences. Hungry? Meals in minutes, thanks to a gas-electric refrigerator and a 3-burner gas range with oven. Plenty of cabinet space for foods, dishes, utensils. Important closet space too.

Here's bedtime luxury! Thick, polyfoam mattresses, ready for your first yawn. Your Avion sleeps four comfortably. There's a cozy double bed in the cab-over section. Pleasant dreams!

With Avion's host of self-contained features, who needs campground facilities! You're on a holiday for kings! Pressure water system with hot running water. Airline-style bathroom with lavatory, shower, marine toilet and holding tank. Complete 12-volt battery system for electricity far from the power line. Automatic heating unit for chilly weather . . . Man, that's livin' – Avion style!

So help yourself to *your* dream. Your Avion dealer will help make it come true with more facts – a demonstration ride – valuable pickup camper coach experience. You'll see first-hand how Avion has put more FUN in pickup camping.

THE FENCES

AVION TRAVEL TRAILER

- Brushed chrome double sink, swing faucet (single

The Wisdom of Quality

It is often said, "you get just what you pay for" . . . For example, let's take travel trailers. There are many makes, many models, many prices. Most manufacturers build for low price. For the "mass market." But a more limited number build for high quality – to satisfy the discriminating minority who put value foremost.

Avion is one of these. From the time we laid the frame for our first travel trailer, every Avion has been built with highest quality first in mind. Why? Because from the start we have believed there are enough value-minded people who appreciate – and will buy – the lasting benefits, the satisfactions, the pleasures inherent in Avion ownership. The rapid growth and success of Avion has proved this to be true. It has proved the Wisdom of Quality. To prove it to yourself, we invite you to step up to Avion Quality – for *your* pleasure and satisfaction as one who appreciates the better things in life.

You never *spend* for quality – you *invest* in it.

From the long luxurious *Imperial* to the cozy compact *Sportsman* you'll find a lengthy list of living comforts and conveniences plus the same degree of Avion Quality throughout. And whoever said "Specifications are boring"? Just a glance down Avion's column of exciting *standard* features will give you a taste of Avion quality and completeness not found in other brands. Floor plans, too, can be fun. So look them over – and choose your Avion from the great new fleet of the finest travel trailers for 1967.

AVION®

TRAVEL TRAILERS

New for 1967

New Models – Longer, roomier, more livable – new lengths of 22 ft., 28 ft. and 31 ft.

New Travel Independence – Self-containment is standard for full independence from outside sources. Luxury living wherever you go.

New Interior Fixtures – Airline-style lined draperies, high intensity lighting, monorail drawer slides, crystal clear mirrors.

New Suspension – Smooth-Glide by MOR/ryde – cushions your Avion wherever you tow.

New Decorations – Four excitingly colorful groups – choose your draperies, upholstery, counter tops and woodwork stains.

New Exterior Lights – Front and rear double bulb cluster lights meet I.C.C. regulations. Approved new style tail lights, too.

Ask your Avion dealer or write for your free copy of Avion's complete 16-page Travel Trailer Catalog for 1967.

Travelcading adds new excitement, extra fun to AVION ownership.

When you own an Avion, you are eligible to join the Travelcade Club. As a member, you enjoy the fellowship of experienced Avioners and the fun of Unit activities. Travelcaders participate in local Rallies involving weekend or week long trips. They attend semi-annual Rendezvous. And, they also thrill to the high adventure of International Travelcade trips.

Lasting friendships and memorable events are just some of the many benefits of Travelcading in your Avion. Truly, it opens up a wonderful new life for you!

Get a Travelcade Club folder from your Avion dealer, or write.

GUIDED TOURS are conducted at each factory, Monday through Friday. Write for a schedule.

Avion Coach Corporation reserves the right to make changes at any time, without notice, in prices, color, materials, equipment, specifications and models, and also to discontinue models or make improvements without incorporating such changes in previous models.
